RPA Energy, Inc. d/b/a Green Choice Energy

April 2024 Pennsylvania Disclosure Label

Electric suppliers are required to provide customers with environmental disclosure labels. The label enables customers to look at the energy sources, air emissions, and information about the supplier’s company to make a more informed choice of a power supplier. Based on the most current data available at the time of filing, please see the environmental information for electricity offered by RPA Energy, Inc. d/b/a Green Choice Energy (RPA) below, based on the most current data available at the time of filing.

Notes

- The PJM system mix represents all resources used for electricity generation in the region. RPA Energy, Inc. d/b/a Green Choice Energy (RPA) purchases power from the PJM system mix and backs 100% of load with hydro-based renewable energy credits.
- CO₂ is a “greenhouse gas” which may contribute to global climate change. SO₂ and NO_x released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthy component of “smog.”
